

## TK<sup>+</sup>/TPK<sup>+</sup> – The NEW Precision

TK<sup>+</sup> Low-Backlash Hollow-Shaft Flange Gearhead  
TPK<sup>+</sup> Low-Backlash Right-Angle Gearhead

alpha

a WITTENSTEIN AG company

## TK+/TPK+ – The key to a new design freedom

The new right-angled gearheads TK+/TPK+ from alpha brings you a new innovation potential – for your machine productivity as well as possible design solutions. Its combination of an ISO robot flange and a hollow-shaft in the same unit gives you a maximum of design freedom – for turntables, grippers, tool changers and tilting axes. With the TK+/TPK+ you can even build your own linear actuator using standard servo motors.

The TPK+ offers for higher ratios extra-high positioning precision and power density, which opens up yet another host of innovation opportunities: lighter and faster travelling axes, replacement of cam turntables, increased robot productivity on the 7th axis, downsized positioning drives, and much more.

With the hypoid gear technology of the TK+/TPK+, we have overcome the traditional limitations of bevel gears. With the + we bring you more torque, a lower noise level and increased productivity.

Let yourself be inspired.

Your advantages at a glance:

High-speed continuous operation in packaging machinery.  
Dynamic cyclic operation in automation applications.  
Optimal smooth running in printing and converting machinery.

Our system solution alpha rack & pinion in combination with the **TK<sup>+</sup>/TPK<sup>+</sup>** is optimal for handling automation as well as the 7 axis for industrial robots.

With the advanced **TK<sup>+</sup>/TPK<sup>+</sup>** right-angle gearhead we offer you new technical and economical opportunities to suit your creativity.

## TK+/TPK+ – opens new doors

### Higher productivity

Do you demand maximum productivity from your machine?

With up to 200 % more torque and 100 % higher speeds than comparable products, the TK+/TPK+ offers the optimum performance for maximum output.

### Simple and convenient

From an optimised design with our cymex software, to our patented alpha motor mounting system and identical oil flow rates for all mounting orientations: the TK+/TPK+ pulls out all the stops to make your job as easy as possible.

TK+

## Cutting edge innovations – made by alpha

We have been developing, manufacturing and distributing low-backlash planetary gearheads, servo right-angled gearheads, complete drive units and planetary elevator machines with an integrated servo motor since 1984.

Profit from our comprehensive service package: from individual components to complete systems, supported by our competent engineering services. Nearly thousand employees worldwide get involved with offering this service to you. alpha's headquarters are on the "Romantic Road" in Igersheim / Germany.

alpha is a member of the WITTENSTEIN AG Group which has rightly established a name for itself with numerous innovations in industries such as aerospace and simulation, medical technology, elevator drives and Formula One racing.

### Extraordinarily robust

The TK<sup>+</sup>/TPK<sup>+</sup> is extremely reliable thanks to its ultra-rugged overall design and 100 % alpha inspection – "fit it and forget it". With integrated thermal length compensation, the TK<sup>+</sup>/TPK<sup>+</sup> also maximises the service life of your servo motor in high-speed continuous duty.

### Compact and totally flexible

A right-angle drive with the TK<sup>+</sup>/TPK<sup>+</sup> makes your machine more compact. With reduction ratios from  $i = 3$  to  $i = 100$  (TK<sup>+</sup>) and  $i = 12$  to  $i = 100$  (TPK<sup>+</sup>) with the TP<sup>+</sup> output – the industry standard from alpha – it represents an attractive alternative for almost any design concept.

### Reliable and precise

The low torsional backlash and high torsional stiffness of the TK<sup>+</sup>/TPK<sup>+</sup> assure the positioning accuracy of your drives and therefore the precision of your machines, even in highly dynamic operations with up to 50,000 cycles/hour.

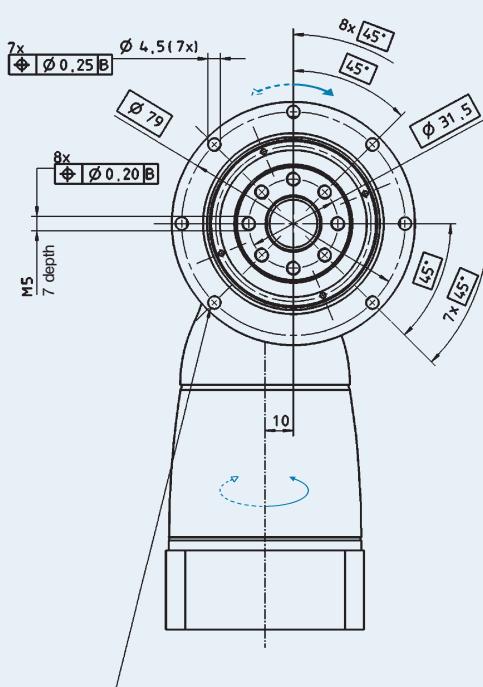

### Leaders of the pack

We are driven by a desire to enhance our customers' success with products and systems from alpha. We set benchmarks when it comes to precision, performance and durability. Our trailblazing technology gives our customers an edge in their respective market sectors. Place your trust in premium quality and total reliability from alpha. Choose world class engineering – the foundation for strong partnerships and added value that is passed on to your customers.

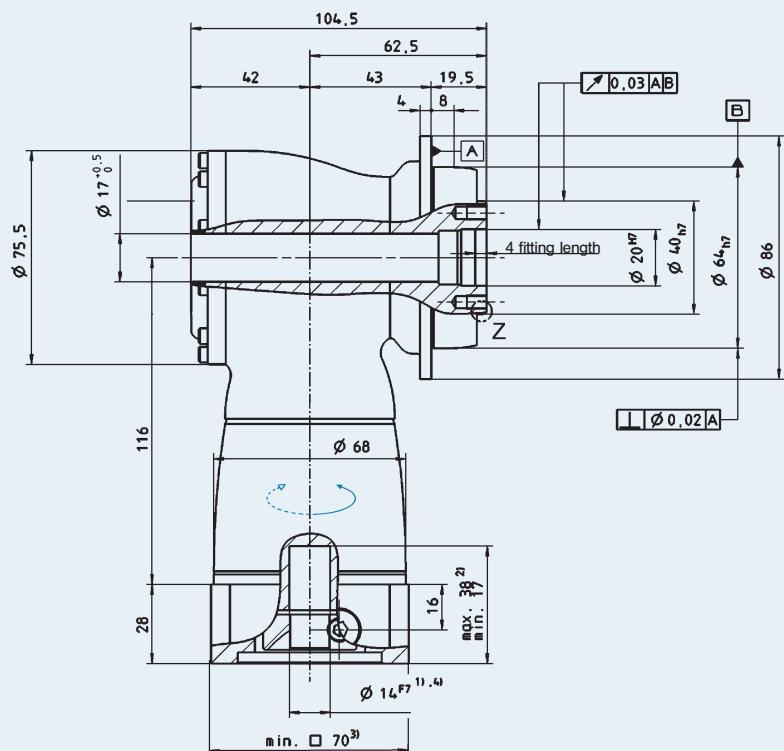

### alpha benefits at a glance:

- **Record-breaking lifespan**  
Extremely long service life resulting from intelligent design, latest synthetic lubrication technology, exclusive sealing technology, and incredibly strong output bearings.
- **Motor mounting is almost foolproof**  
Simple and reliable mounting in a single step.
- **Top quality from alpha**  
In-house development and manufacture of all products combined with a pioneering spirit and an insatiable urge to improve.

## TK+/TPK+ innovations:

### Extremely easy and reliable motor mounting

The motor shaft is simply clamped with a single bolt

### Oil flow rate independent of the installation position

The revolutionary design principle means the installation position no longer has to be specified in the purchase order.

## Symbols and Index

Symbol	Unit	Designation

0	no-load running
R/r	radial
t	torsional
capital letters	permissible values
small letters	actual values

## Quick Gear Selection

The following chart can be used to quickly select a gearbox. However, for best results, we recommend that you utilise the gearbox selection charts in the **alpha Technical Basics** catalogue (can be downloaded from [www.alphagtriebe.com](http://www.alphagtriebe.com)) or use alpha's **cymex® 3.0** servo/gearbox sizing software to design your drive train.

<b>Cyclic operation S5</b> Number of cycles $\leq$ 1000/hour	<ol style="list-style-type: none"> <li>Using servomotor characteristic data, determine the maximum motor acceleration torque: <math>T_{MaxMot}</math> [Nm]</li> <li>Determine maximum acceleration torque at the gearbox output: <math>T_{2b}</math> [Nm] <math display="block">T_{2b} = T_{MaxMot} \cdot i</math> (ratio)</li> <li>Compare the maximum acceleration torque just calculated with the permissible acceleration torque (<math>T_{2B}</math>) for the selected gearbox from pages 6-23. <b>Requirement:</b> <math>T_{2b} \leq T_{2B}</math> If not, choose another gear reducer.</li> </ol>	<ol style="list-style-type: none"> <li>Verify that the clamping hub diameter (table on page 26) is OK for the selected servomotor.</li> <li>Compare the motor shaft length, <math>L_{Mot}</math> (mm), with the min. and max. clamping hub depth in the dimensional sketches (pages 6-23).</li> </ol>
<b>Continuous Operation S1</b>	In case of continuous running applications, please contact alpha	

\* General guidelines for most applications. Contact alpha if assistance is needed for special cases.

## Ordering key

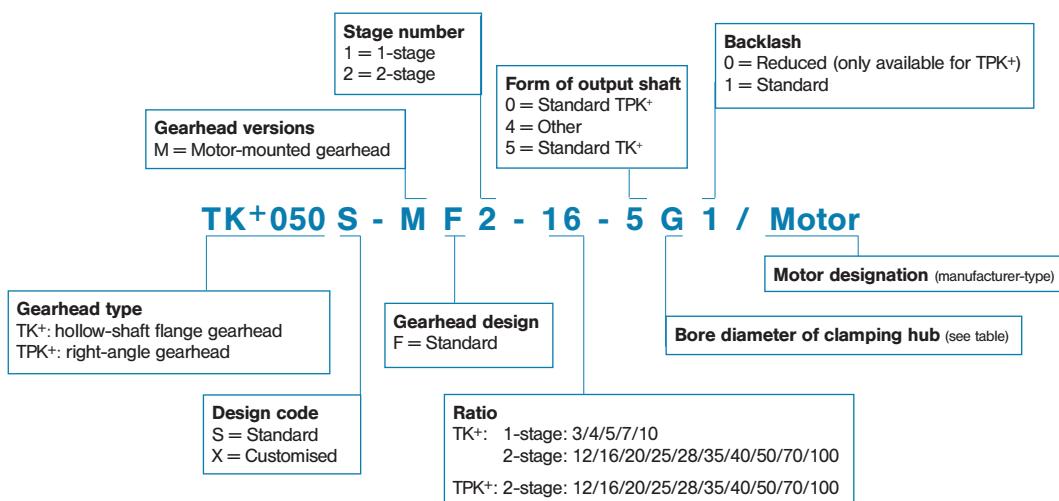

Table of clamping hub diameters

Gearhead stages	TK+					TPK+			
	1 / 2	1 / 2	1 / 2	1 / 2	1 / 2	2	2	2	2
Motor shaft diameter (mm)*	004	010	025	050	110	010	025	050	110
11	- / B	- / -	- / -	- / -	- / -	-	-	-	-

- Select next higher letter

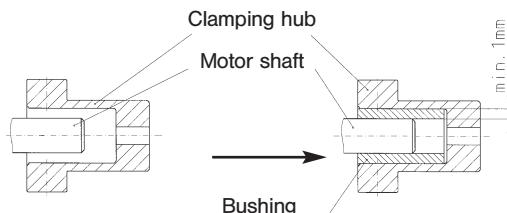

+ Select next larger gearhead

\* If your motor shaft diameter is not listed, add 2 mm to diameter and select next higher size.

\*\* Geometry not shown in the drawings; dimensions available upon request.

## Bushing

If the diameters of the motor shaft and the clamping hub do not match, a bushing is used.  
Minimum wall thickness of the bushing is 1mm.

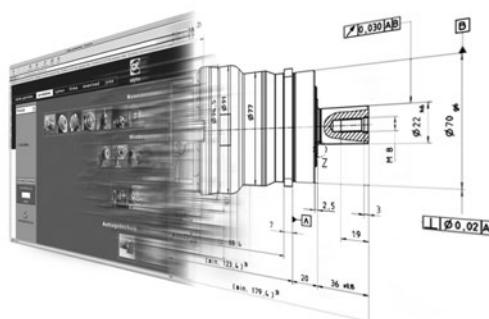

**alpha's cymex®** calculation software makes it easier than ever to design the most complex drive trains with just a few mouse clicks.

### application – gearhead – motor

cymex® simplifies technical documentation, and customised engineering designs are possible at any time thanks to data in DXF format.

Use **cymex®**.

easy – quick – reliable

## Additional alpha products

### SP® & SP+ HIGH SPEED® – The NEW Generation

Low-backlash planetary gear reducers with output shaft.  
SP+ HIGH SPEED best qualified for highest speed in continuous operation.  
Torsional backlash  $\leq 1$  arcmin.  
Acceleration torque up to 4500 Nm.

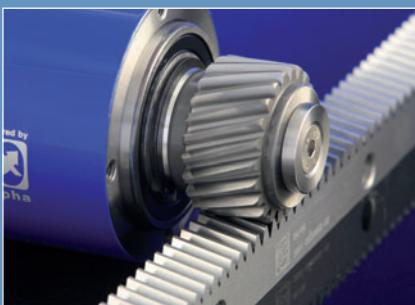

### TP+ & TP+ HIGH TORQUE® – Compact Precision

Low-backlash planetary gear reducers with output flange. Qualified for highest positioning accuracy and high-dynamic cycle operation.  
High torsional and tilting rigidity.  
Torsional backlash  $< 1$  arcmin.  
Acceleration torque up to 10.000 Nm.

### alphira® – the basic precision

low backlash / low friction / alpha quality  
For stepper and basic servo applications.  
Acceleration torque up to 200 Nm.

### Rack & Pinion System

**PRECISION SYSTEM** – For exacting dynamics and precision requirements in high-end applications  
**SMART SYSTEM** – For flexible mounting with more degrees of freedom in mid-range applications  
**ECONOMY SYSTEM** – For standard linear tasks in economy applications

### Hypoid Gearhead

Right-angle gearhead of highest precision and compactness. Torsional backlash  $\leq 4$  arcmin.  
Acceleration torque up to 640 Nm.  
Output shaft variations:  
SK+: smooth, keywayed, involute tooth to DIN 5480  
TK+: flange  
HG+: hollow shaft

### Hypoid Planetary Gearhead

Right-angle planetary gearhead of highest precision and power density.  
Torsional backlash  $\leq 2$  arcmin.  
Acceleration torque up to 1600 Nm.  
Output shaft variations:  
SPK+: smooth, keywayed, involute tooth to DIN 5480  
TPK+: flange

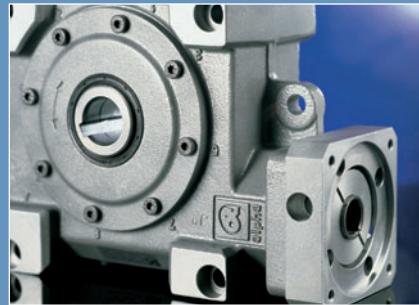

### LP+ & LPB+ – Value Line Economic and multi-talented

Low-backlash gear reducers with output shaft for economical servo applications.  
Torsional backlash  $\leq 8$  arcmin.  
Acceleration torque up to 450 Nm.  
Optional available as LPB+, with geared pulley mount.

### Coupling – TL / BC / EC

Patented, backlash-free, compact and torsionally stiff metal bellows and safety couplings. Acceleration torque up to 10,000 Nm  
Disengagement in 1 – 3 ms  
Belt tension 100 – 12.000 N.  
Self-adjusting

### V - Drive®

Right-angle gearhead – short and compact.  
Torsional backlash  $\leq 3$  arcmin.  
Acceleration torque up to 1469 Nm.  
Options output:  
VDS: smooth, keywayed, involute tooth to DIN 5480  
VDT: flange  
VDH: hollow shaft, smooth or keywayed
